

Our Core-Product Currently Under Development - ADAMftd

International Centre for
Trade Transparency
& Monitoring

ADAMftd (Advanced Data Analytics and Modeling for Foreign Trade Data) stands as a testament to ICTTM's commitment to revolutionizing the trade and compliance sector. This platform offers a suite of features that distinguish it in the marketplace:

- Comprehensive Trade Data:** Integrating data from customs, bills of lading, and shipping manifests, ADAMftd provides users with unparalleled insights into global trade flows, offering a macro and micro view of international commerce.
- Reconciliation with Official Company Registries:** Trade data is reconciled against company records from the official government registries, eliminating data duplication errors and enhancing statistical accuracy.
- Unit Price and Landed Cost Analytics:** The platform provides analytics on average unit prices by company and region, alongside comprehensive calculations of total landed costs, aiding in financial planning and competitive pricing strategies.
- Predictive Market Analytics:** Leveraging advanced analytics, ADAMftd offers predictive insights into market trends, demand forecasts, and potential disruptions, empowering businesses to make proactive decisions.
- Rules, Regulations, and Compliance Calculations:** ADAMftd offers detailed tracking and calculations related to rules, regulations, and compliance, tailored to specific products, further enhancing risk management and operational compliance.
- Legislative and Compliance Tracker:** ADAMftd automatically updates its data with the latest regulatory changes, ensuring compliance with international trade laws and reducing the risk of penalties.
- Supply Chain Visualization:** With ADAMftd, businesses can map out their entire supply chain, identifying potential vulnerabilities and optimizing for efficiency and resilience.
- Detailed Beneficial Ownership and Company Profiles:** In-depth beneficial ownership information, alongside detailed profiles of directors, shareholders, and key staff members.
- GDPR-Compliant Contact Information:** Enabling businesses to safely reach out to potential suppliers, buyers, and partners.
- Advanced Risk Analysis:** ADAMftd integrates sophisticated risk assessment tools to evaluate company-specific, geopolitical, environmental, and foreign exchange risks, enabling businesses to proactively identify and mitigate potential challenges in global trade, ensuring informed decision-making and strategic planning.
